### ***Allowable Subject Matter***

4. Claims 1-30 are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. The closest prior art reference of record, U.S. Patent No. 5,904,737 to PRESTON, fails to teach or reasonably suggest each and every limitation of the instant invention. Specifically, PRESTON discloses a dry cleaning method including transferring densified gas based solution from a storage tank to a wash tank to clean a dry-cleanable article, returning the densified gas based solution to a storage tank, transferring a second densified gas based solution from a storage tank to the wash tank to clean the dry-cleanable article, and returning the second densified gas based solution to a storage tank. However, PRESTON does not teach or reasonably suggest the

storage tank being a divided working tank with first and second liquid chambers for the first and second densified gas based dry-cleaning solutions, respectively, such that the chambers share a common vapor space (as in claims 1 & 24) or including the step of transferring a first volume of a first carbon dioxide based dry-cleaning solution from a first liquid chamber to a third liquid chamber of a divided working tank which precedes a transferring step of a first solution from the first chamber to a wash tank (as in claim 8).

7. For at least the foregoing reasons, the claims are believed to recite patentable subject matter.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
